People fled to CAR

33,603

People fled to Ethiopia

3,433,025

People internally displaced

Sources of displacement data:
IDPs, IOM DTM; refugees, UNHCR

This is a document reporting on the severity of the protection impacts on the civilian population as a result of ongoing conflict in Sudan. Clashes between the Sudanese Armed Forces (SAF) and Rapid Support Forces (RSF) erupted on 15 April 2023 and are now in their eighteenth week.

Deaths and Injuries:

- On 11 July, the Federal Ministry of Health stated at least 1,105 people have been killed and 12,115 injured due to the conflict. No more recent public are known to be available. Actual figures are undoubtedly higher with communications challenges and ongoing violence inhibiting systematic reporting.
- Since the fighting started, 19 humanitarian workers have been killed and many others have been injured. In addition, according to WHO, 11 health workers have been killed and 38 injured.
- On 8 August, the Unit for Combating Violence Against Women reported that they have documented 124 cases of sexual violence against women and girls across Khartoum (60 cases), South Darfur (43 cases), and West Darfur (21 cases). The increase was primarily driven by 12 new cases identified at Kalma camp in South Darfur. The actual number of incidents is likely to be much higher, with reporting inhibited by lack of access to services, ongoing security risks and community stigma.

Impact on Civilians:

- In Khartoum, clashes between SAF and RSF continued, amidst indiscriminate shelling including of civilian residential areas. Of the estimated 2,553,817 people displaced from Khartoum, approximately 39,690 IDPs have sought refuge in other locations across Khartoum state while 2,514,127 have fled to other states across Sudan.
- In River Nile, an estimated 500,979 IDPs from Khartoum are reportedly seeking shelter with relatives or in rented accommodation across across Abu Hamad, Ad Damar, Al Buhaira, Al Matama, Atbara, Barbar, and Shendi localities.
- In Northern State, an estimated 362,136 IDPs, all reportedly displaced from Khartoum, are sheltering across Ad Dabbah, Al Burgaig, Al Golid, Delgo, Dongola, Halfa, and Merowe localities. Almost one in five IDPs in Northern State intend to move to another location, with most intending to travel onward to Egypt; however, restrictive visa processes are inhibiting travel across the border.
- In Sennar, an estimated 282,352 people displaced from Khartoum are sheltering with host families and in rented accommodation across Abu Hujar, Ad Dali, Ad Dinder, As Suki, Sennar, Sharg Sennar, and Sinja localities.
- In White Nile, 279,895 IDPs are reportedly sheltering with their relatives, in camp-like settings, in rented accommodation and in public buildings across Ad Diwaim, Aj Jabalain, Al Gitaina, As Salam/Ar Rawat, Guli, Kosti, Rabak, Tendalti, and Um Rimta localities. IOM DTM notes that almost one in three of the caseload are non-Sudanese nationals.
- In North Darfur, an estimated 275,105 individuals are displaced, with the reduction in the IDP population since the last report attributed to movement of IDPs from Tawila towards both El Fasher locality in North Darfur and Jabal Marra in Central Darfur. IDPs are sheltering across Al Fasher, Al Koma, Al Lait, Al Malha, As Serief, At Tawisha, Dar As Salam, Kebkabiya, Kelemando, Kernoi, Kutum, Melit, Saraf Omra, Tawila, Um Baru, and Um Kadadah localities.
- In East Darfur, IOM DTM estimates 260,055 IDPs to be predominately sheltering with host community households following the expansion of data gathering

activities into several previously restricted localities. IDPs are reportedly present in Abu Jabrah, Abu Karinka, Ad Du'ayn, Adila, Al Firdous, Assalaya, and Bahr Al Arab localities.

- In Al Jazirah, IOM DTM field teams report 238,529 IDPs sheltering with relatives in the host community, in rented accommodation, public buildings and open area gathering sites across Al Hasahisa, Al Kamlin, Al Manaqil, Al Qurashi, Janub Aj Jazirah, Medani Al Kubra, Sharg Aj Jazirah, and Um Algura localities.
- In Gedaref, an estimated 232,842 IDPs displaced from Khartoum are sheltering across Al Butanah, Al Fao, Al Fashaga, Al Galabat Al Gharbyah-Kassab, Al Mafaza, Al Qureisha, Ar Rahad, Basundah, Gala'a An Nahal, Galabat Ash-Shargiah, Madeinat Al Gedaref, and Wasat Al Gedaref. IDPs are predominately sheltering in informal hosting arrangements, with the increase in the population attributed to expansion of IOM DTM monitoring activities.
- In South Darfur, an estimated 230,585 individuals are predominately displaced from other areas within South Darfur. IDPs are reported to be sheltering across Al Wihda, As Salam, As Sunta, Beliel, Buram, Kas, Mershing, Nitega, Nyala Janoub, Rehaid Albirdi, Sharg Aj Jabal, and Tulus localities.
- In Central Darfur, an estimated 217,635 individuals are displaced from other areas in Central Darfur, West Darfur, South Darfur and North Darfur. IDPs are predominately sheltering with relatives or in improvised shelters, across Azum, Gharb Jabal Marrah, Shamal Jabal Marrah, Um Dukhun, Wadi Salih, Wasat Jabal Marrah, and Zalingi localities.
- In multiple states, displaced populations of fewer than 150,000 people were reported by IOM DTM. Affected states include: West Darfur (103,355); Red Sea (102,273 displaced individuals); Kassala (78,695 displaced individuals); North Kordofan (77,912 displaced individuals); South Kordofan (69,455 displaced individuals); Blue Nile (45,259 displaced individuals); and, West Kordofan (36,273 displaced individuals). In most states outside Darfur, the majority of the IDP caseload originates from Khartoum state.

Medical Facilities:

- The WHO Surveillance System for Attacks on Health Care (SSA) indicates that 53 attacks on health care have been reported since the onset of the violence on 15 April, of which: 34 attacks impacted facilities; 23 attacks impacted personnel; 14 attacks impacted supplies; eight attacks impacted transport; seven attacks impacted patients ; and, six attacks impacted warehouses.
- Out of 89 main hospitals in Khartoum and across the country, 71 are reportedly out of service (79.8%), with the remainder operating at only partial capacity.
